

Patterns investigation

For this week's maths our task was to find objects around the house that make a pattern and these are a few:

Our Chairs:

Our chairs are set up as the left and right sides have green covers and the top and the other ends have cream covers.

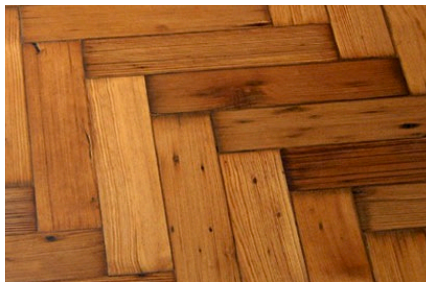

Silver decorations:

As I was wondering around the house and I noticed that we have these 3 silver decorations; 3 silver candles surround them, and they make a pattern of, 123,123.

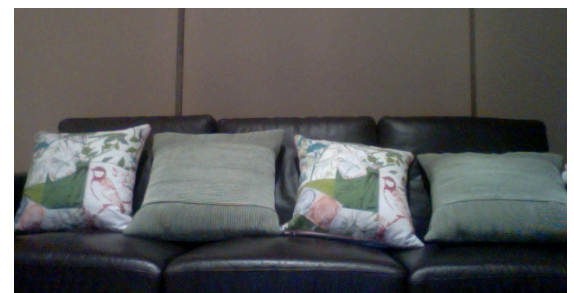

Floor

Our floor is in a pattern covering the entire kitchen floor in a continuous arrow pattern that does not overlap kitchen floor pattern.

Pillows:

I arranged the pillows in our lounge room so they are arranged in a colour-coordinated scheme. The pattern was white, green white green.
